WWN Speakers Bureau

World Women in Neuroscience (WWN) aims to improve career development, mentoring and networking opportunities for female neuroscientists around the world. In collaboration with the International Brain Research Organization (IBRO), WWN is launching an exciting new activity in 2023: we will be providing a Speaker’s Bureau of WWN experts and other neuroscientists across the globe that will support and expand our vision and global impact.

Why Should I Join a Speakers Bureau?

Share Your Expertise - As a speaker at national and international meetings, a panelist at scientific and professional development webinars, the World Women in Neuroscience (WWN) speaker’s bureau will provide a consistent platform to share your scientific and professional expertise with global audiences.

Streamlined Portal- Being part of an effective speakers’ bureaus proves its worth! As part of a one-stop resource with tools for housing credible speakers, it enhances WWN’s credibility in the neuroscience field and streamlines the selection process. WWN’s speaker’s bureau provides a single point of contact to secure the appropriate keynote or seminar speaker. The selection process assures that you have no conflicts of interest and no motivation other than to share your expertise and build long-term relationships. This process also save money for clients, ensures that the appropriate speaker is matched with the topic and audience

Valuable Professional Relationship - As a participant in the WWN speaker’s bureau, you establish a valuable professional and business relationship with WWN for years to come.

This not only advances our strategic platform and messages worldwide but positions you as a credible expert in in your respective field(s).

Career Development/Networking – Speaking opportunities allow you to constantly hone, enhance and adapt your communications skills to impact worldwide and diverse audiences. And it provides opportunities to establish and maintain beneficial connections with other WWN members throughout the year.

Mentoring - We all know that mentoring is important. By virtue of your partnership with WWN as a speaker and the time, energy, and passion you devote to this effort, you are in fact a profound influencer to a broad array of scientists at various career stages that you impact through your speaking engagements.
